## **DETAILED ACTION**

1. Claims 28-39 are presented for examination. Applicant filed amendment on 07/27/2009 amending claims 28, 37, and 39. After carefully reviewing Applicant's amendment, Examiner withdraws the outstanding rejection of claims 28-39. Therefore, claims 28-39 are ALLOWED.

### ***Allowable Subject Matter***

2. Claims 28-39 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The claimed invention is directed to a method for generating and displaying annotations in relation to one or more prices corresponding to trader or market related events.

The prior art of record, Ram et al., US patent Publication No. 2003/0004853 A1, teaches displaying via a computing device a price axis, wherein the price axis includes a plurality of price levels for a tradeable object; displaying via the computing device market data related to the tradeable object, wherein the market data is displayed along the price axis, wherein the market data includes bid and ask quantities for the tradeable object; and displaying via the computing device a plurality of order entry regions, wherein each order entry region corresponds to a

price level of the plurality of price levels, where each order entry region is adapted to receive a command to place an order for the tradeable object at the corresponding price level.

However, the prior art does not disclose receiving via the computing device a definition for an annotation, wherein the definition includes an annotation price level and annotation information, wherein the definition is specified by a user, wherein the annotation price level includes at least one price level of for the tradeable object; processing via the computing device the definition to determine that at least one of the price levels of the annotation price level is within the plurality of price levels of the price axis; and displaying via the computing device the annotation by displaying the annotation information along the price axis at the at least one of the price levels of the annotation price level determined to be within the plurality of price levels of the price axis.

These features are found in independent claims 28 and 39. Therefore, independent claims 28 and 39 are allowable. Claims 29-38 are all dependent claims depending from claim 28. Therefore, dependent claims 29-38 are also allowable.

***Conclusion***
